Summary

Full Stack Developer with hands-on experience building production-grade web and mobile applications using React.js, Next.js, Node.js, Express, GraphQL, and PostgreSQL. Proven track record of independently shipping end-to-end products including payment integrations, real-time systems, and event-driven architectures. Strong working knowledge of cloud deployment (AWS, Google Cloud, Docker) and emerging Agentic AI / RAG (Retrieval-Augmented Generation) systems.

Experience

TDC Consultancy Pvt. Ltd.

Full Stack Developer

India

2023 – Present

- Contributed to the development of an industry-level ERP software and an e-commerce platform using React.js, Next.js, GraphQL, Express, and PostgreSQL, enhancing product functionality and user experience for live clients.
- Built and optimized backend job processing pipelines using BullMQ and worker queues to handle asynchronous and scheduled tasks reliably.
- Deployed, monitored, and maintained applications on Google Cloud Platform and AWS, ensuring scalable and secure infrastructure for production systems.
- Collaborated with a cross-functional team of developers to implement new features for an online shopping platform, demonstrating strong full-stack development skills and adaptability in a fast-paced, agile environment.

Projects

SkyTrek Adventure | *Node.js, Express, GraphQL, Next.js, AWS EC2/S3, TypeORM, Mantine UI* skytrekadventure.com

- Built a full-stack adventure park and campsite booking platform with complete cart and payment workflow.
- Integrated the PayU payment gateway and WhatsApp Business API for online booking and customer communication.
- Deployed the application on AWS EC2 with AWS S3 for media storage and Supabase PostgreSQL (TypeORM) as the database layer.
- Configured Umami visitor analytics via Docker and developed an admin dashboard using Mantine UI.

Wealth Builders | *Next.js 16, Fastify, PostgreSQL, AWS S3, Material UI*

wealthbuilderss.com

- Developed a finance, investment, and portfolio management platform to handle customer investments, monthly profit distribution, and referral commissions.
- Implemented NAV-based automated monthly profit distribution and a recurring referral commission engine for agents and partners.
- Built secure, role-based user and admin dashboards with a Fastify backend, PostgreSQL database, and AWS S3 for file storage.
- Designed a fully auditable transaction system ensuring permanent, traceable financial records.

Astro Analysts | *Next.js 15, React 19, Apollo GraphQL, Apache Kafka, Puppeteer, Razorpay*

astroanalysts.com

- Built an event-driven Vedic astrology (Kundali) consultation platform that generates dynamic, multilingual (English/Hindi) PDF reports.
- Designed a Kafka-based message broker architecture to decouple high-overhead PDF generation from the core API server, improving scalability.
- Integrated Razorpay checkout with cryptographic webhook validation for real-time billing, automated email invoicing, and report generation via Nodemailer.
- Engineered a Puppeteer and Handlebars based PDF rendering engine and automated postal-code-to-coordinates resolution for astrological chart calculations.
- Built a JWT-authenticated admin portal to monitor registrations, manage report queues, and trigger regenerations.

NextInnings | *React Native, Fastify, PostgreSQL, Socket.io*

- Developed a live cricket scoring mobile application enabling users to register profiles and teams and perform real-time ball-by-ball scoring.

- Implemented real-time score updates using Socket.io and integrated live international match scores and news, similar to Cricbuzz.

Luxorae Detailing | *Next.js (App Router), React 19, TypeScript, Tailwind CSS*

luxoraedetailing.com

- Built a premium B2B portal and interactive hotel directory for a commercial detailing enterprise, featuring client mapping, search, and sorting across Udaipur's hospitality sector.

Cinematic Suite | *React, Redux Toolkit, React Router v6, SCSS, TMDB API, Vite*

cinematicuniverse.netlify.app

- Designed and built a responsive movie and TV show exploration catalog using real-time data from the TMDB API, including trending media, search, genre filters, and trailers.
- Configured global state with Redux Toolkit to cache API settings and genre lists, eliminating duplicate network calls; implemented infinite scroll and lazy-loaded images for smooth 60 FPS performance.

YouTube Clone | *React, RapidAPI, SCSS*

youtube-clone-dikshant.netlify.app

- Developed a YouTube-style video browsing application consuming RapidAPI data with a responsive interface built using SCSS.

Technical Skills

Languages: C, C++, Java, JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React.js, Next.js, React Native, Redux Toolkit, Tailwind CSS, SASS, Ant Design, Material UI, Mantine, Shadcn, Aceternity UI

Backend: Node.js, Express.js, Fastify, REST API, GraphQL, Apollo, Prisma, TypeORM

Databases & Cloud: PostgreSQL, MongoDB, MySQL, Firebase, Supabase, AWS (EC2, S3), Google Cloud Platform, Docker, Apache Kafka

Tools: Git, GitHub, Postman, Figma, PgAdmin, MongoDB Atlas, Canva

AI/ML: Agentic AI Systems, RAG (Retrieval-Augmented Generation) Pipelines, Vector Databases, Web Scraping

Education

Techno India NJR Institute of Technology

India

B.Tech in Computer Science Engineering – CGPA: 9.73/10

2020 – 2024

Central Academy Senior Secondary School

Udaipur, Rajasthan

Class 12 (CBSE) – Percentage: 87%

2019 – 2020
